

Front End Assignment

Objective:

To write a simple 1 page web app using ReactJs / Flutter or any other tech stack you are comfortable with. The app takes location inputs of "Origin" & "Destination" and then plots the route on Google maps along with distance.

Page Design:

You can find the Figma mock-up here: [Layout](#).

Input Rules:

Origin & Destination inputs should fetch location from Google maps. User should not be able to add anything else.

Evaluation Criteria:

Following are the evaluation criteria:

- How close your page is to the Figma mockups;
- How clean and organized your code is;
- Is it working as expected;

Delivery Instructions:

Send us a link to your GitHub repository and make sure it is public. Also, host your working app on Heroku, Netlify, etc. as per your convenience & send a link.
